

Rotary Size Grader

for Whole Snipped Green Beans

Knuckle Removal From Whole Snipped Green Beans!

Improve downstream process operations

- Fewer defects [knuckles] carried forward into plant
- Cutters less likely to plug from knuckles and stems
- Blanching and freezing efficiencies increased
- Shaker grader “blinding” reduced

Improve optical sorting performance

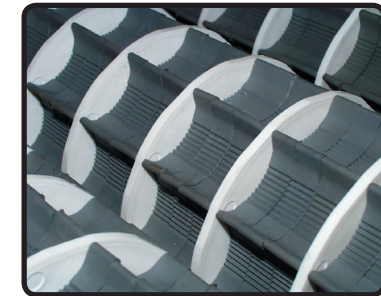

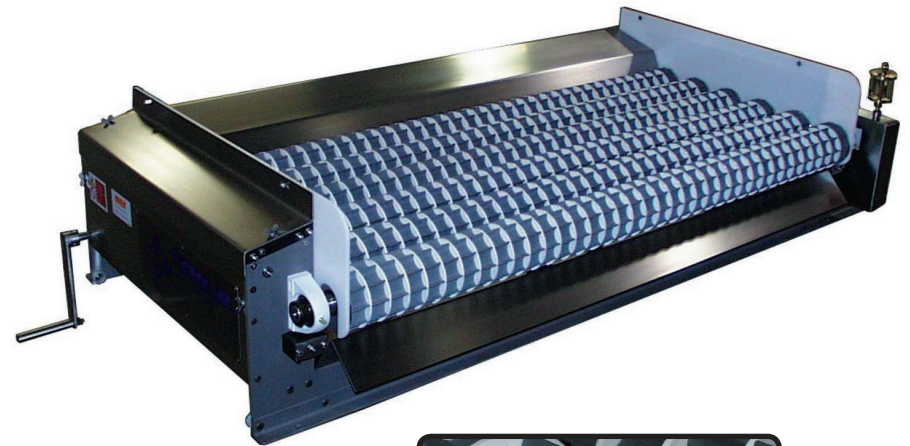

- Sorters see fewer defects allowing better targeting efficiency
- Less good product is discharged with defects

Improve end product quality

- Knuckles, small broken pieces, and EVM removed early in the process

Additional features / benefits

- Low Maintenance
- Low cost of operation
- Space-saving small footprint
